

The ideal fish transport tanks for professional fish farmers and sport fishermen.

Live fish are at risk if unsuitable or inferior containers are used during transport.

Many years ago LINN Gerätebau developed the **Thermoport** fish transport tank, which eliminates risks to the fish stock. The economical and well-proven tanks are available in four sizes:

190 – 290 – 600 and 800 litres. The containers are produced in one piece without welds and consist of food-grade and chemically resistant plastic (PE). Consequently, they are very robust and impact resistant.

The lids of the two bigger tanks (600 and 800 litres) have been redesigned and improved. The lid and aperture have been enlarged considerably, making loading and unloading fish even easier and more convenient. In addition, the lock of the lid locking mechanism has been developed and improved. The well-proven labyrinth seal has been retained (integral, no rubber seal). This ensures a good seal, and is not subject to frost.

The perfected design of the tanks with rounded corners prevents injuries to the fish. The design reduces up and down 'slopping' of the water, and the fish are held steady. The containers have convenient recessed handles (except the 190 litres containers, where the grips are screwed on). The sandwich-construction (600 and 800 litres) has outstanding insulating properties that guarantee stable water temperature, vital for salmonids, cyprinids and ornamental fish.

All **Thermoport** containers have a drain (1 1/4") with a plug. On request, a ball valve can be fitted in place of this. This drain point is screened internally (190 and 290 litres for an extra charge)

so that only water can escape. For quick and easy discharging of the fish, a fish-friendly ball sluice can be fitted (to order).

Advantages:

- four sizes 190 – 800 l
- unique, double-wall protection and insulation (600 + 800 l)
- conveniently designed with handles and rounded corners

Technical

Volume	Dimensions	Lid	Weight
190 litres	85 x 55 x 45 cm	70 x 35 cm	13 kg
290 litres	85 x 55 x 65 cm	70 x 35 cm	17 kg
600 litres	110 x 75 x 76 cm	86 x 51 cm	33 kg
800 litres	110 x 75 x 100 cm	86 x 51 cm	47 kg
